OBJECTIVE

A self-motivated, hard-working Full Stack Web Developer with 1 year of experience in MERN Stack development, possessing strong problem-solving skills. A team player eager to work with growing organizations to further enhance skills. Passionate about creating user-centric products, and currently seeking a full-time role as a MERN Stack Developer.

EDUCATION

Bachelor of Mechanical Engineering , A.P.J Technical University	2016 - 2020
Intermediate , Bright Way Inter College	2015 - 2016

SKILLS

Backend	Node.js, Express.js
Frontend	React.js, HTML, CSS
Database	MongoDb, AWS-S3
Tools and Technology	Git, Postman
Soft Skills	Communication, Time Management

EXPERIENCE

MERN STACK DEVELOPER Koolmind Technolab LLP	Sept 2023 - Present <i>Ahmadabad, Gujarat</i>
---	--

- Enhance my technical skills through the development of diverse projects.
- Successfully deployed numerous projects on AWS.
- Experience in leading and managing a team, including overseeing project development and ensuring successful delivery.
- Developed various projects, including E-Commerce platforms, Chatting and Calling applications, and Learning Management Systems using React.js, Node.js, MongoDB, and AWS-S3.

PROJECTS

Education Platform. Worked as a MERN Stack Developer to build a study tool for students using ReactJS, NodeJS, and MongoDB. Additionally, developed an admin portal for the management team with the same tech stack. My responsibilities included handling the backend and integrating APIs into the frontend to ensure seamless functionality across the application.

Health-Care E-Commerce Developed a project for shopping medical kits using the MERN stack. As a MERN stack developer, I was responsible for handling the backend, designing the web application, and integrating APIs.

Chat-Application Developed a mobile application for chatting and calling between students and teachers using the MERN stack. As a MERN stack developer, I was responsible for backend development, designing the admin panel, and integrating APIs.

Movix-DB Developed an IMDb-based project where users can search for movies or TV series, view descriptions and ratings, and watch trailers. This project was built using React.js.

AWARDS AND RECOGNITION

- Achieved Certification on Hacker-Rank in Problem Solving.
- Achieved Certification on Hacker-Rank in JavaScript.
